

Explanation

Explain using a series of steps how the menstrual cycle works to include, hormone, egg and uterus.

Application

Symbolically represent 2 of the hormones in the cycle and 2 receptors that would fit them.

Menstrual Cycle

Perspective

Describe (infer) from the perspective of the uterus, what happens when estrogen and progesterone is high, and when they are low

Self-Knowledge

Write 5 pre-test/post test questions for 7th grade class studying the menstrual cycle. Provide an answer key.

Interpretation

View animation "How the Pill Works." Represent the menstrual cycle for a 28 cycle in the presence of the pill. Represent the differences that exists with and without the pill.

Empathy

Assume the role of LH and describe the path of LH from start to completion of the menstrual cycle.
